

Simple Assembly

Only a Screwdriver is required

NIGEL B DESIGN'S UNIVERSAL MOUNTING PLATE ALLOWS OUR AMPLIFIERS & OTHER EQUIPMENT* TO BE HIDDEN BEHIND ANY FLAT SCREEN TV OR MONITOR USING ANY TILTING WALL MOUNT BRACKET

* Includes many Digital Signage Players

70 /25 Volt Amplifiers in both 50 & 90 Watt RMS Output

4/8 Ohm Amplifiers in both 50 & 90 Watt RMS Output

4/8 Ohm Amplifier with 50 & 90 Watt RMS Output with RS232 Control

70 /25 Volt Amplifiers in both 50 & 90 Watt Outputs with RS 232 Control

All our Amplifiers are 1 3/4" High and only use a 1/4 of 1 Rackspace.

Tilting Wall Mounts usually have a 2" Clearance between the Mount and Monitor.

Our Universal Mounting Plate allows our Amplifiers and other Equipment to be attached to most Tilting Wall Mounts without modification of any of the Devices regardless of its Mount's Tilt Position. Using the Peerless® Tilting Wall Mount 650 Series demonstrates the Ease and Versatility of our Universal Mounting Plate that simply clips on to the Wall Mount in several different positions and configurations.

IDEAL FOR MULTIPLE SPEAKER INSTALLATIONS

Any large room or space will benefit by using either our 50 Watt or 90 Watt RMS Amplifiers in Multiple Speaker Installations.

Wiring for the Ceiling Speakers is usually run inside the wall and with the Amplifier, Power Supply, Digital Signage Player and Control Device installed behind the Monitor, the whole installation is completely hidden from view.

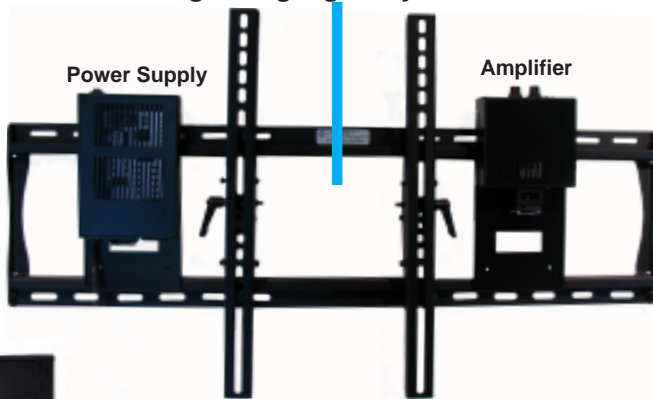

70/25 VOLT AMPLIFIERS IN EITHER 50 OR 90 WATT VERSIONS

Our 70/25 Volt Amplifiers overcomes the problem of Monitors not having 70/25 Volt Outputs. Now you can connect from our 70/25 Volt Amplifiers directly to multiple 70/25 Volt Speakers.

Our RS 232 Plus Series Amplifiers in either 70/25 Volt or 4/8 Ohm configurations can be controlled using any popular Controller

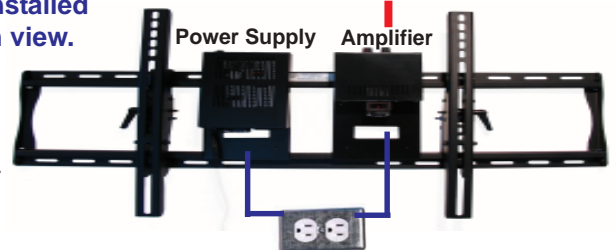

Your Controller or Digital Signage Player can be fitted in this space

Peerless Smartmount® Model ST 650 showing a typical Outboard Installation

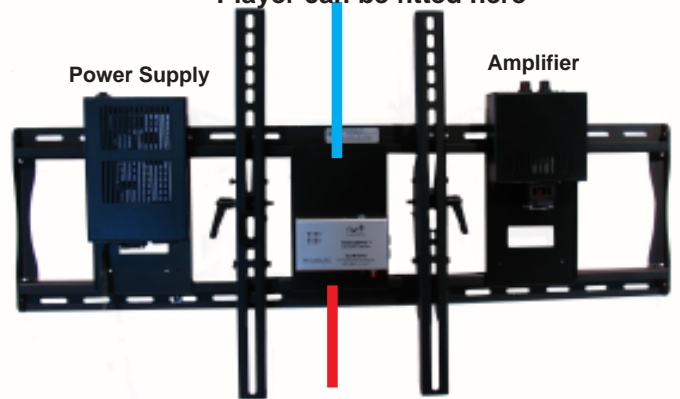

The Universal Mounting Plate has Pre-Drilled attachment holes for any of our Amplifiers, Power Supplies and many Digital Signage Players, allowing the entire assembly to be totally hidden from view.

Amplifier and Power Supply Mounted Inboard

Your Controller or Digital Signage Player can be fitted here
