

With Versions for anti-theft or mobile Applications

When a Projector is sitting on a Desktop or on a Cart unprotected from theft or is installed in a Mobile Installation such as a Cruise ship or similar, where Vibrations can be a issue you will find our Security Adjustable Leveling Feet are the perfect cost effective Solution

OUR ANTI-VIBRATION RETRO -FIT ADJUSTABLE LEVELING FEET CAN BE FITTED TO ANY PROJECTOR

All Projectors are made with their Stems using 8 mm Metric Thread. The replaceable feet are Sold in sets of four, using the same 8 mm Threaded Stems. Each comes in two diameters weight capacities, 2" dia for Projectors weighing between 5- 240 lbs maximum and 2 1/2" dia with a Projector weight up to to a maximum of 350 lbs.

The Front Feet can be adjusted higher so the Projector's Angle Viewing can be increased

2" & 2 1/2" Dia. Feet adjusts the height by 2"

FOR APPLICATIONS WHEN YOU ONLY NEED THE FEET FOR ANTI-VIBRATION PURPOSES

The Stems and all Hardware can be instantly removed in installations when only the Anti-Vibration Pads are required. This allows the Installer to fit their own stems or Bolts.

In the 2" size a 5/16" dia hole with a weight capacity of up to 240 lbs. In the 2 1/2" size weight capacity up to 350 lbs a 1/2" dia size Bolt or Rod can be accommodated, (requires drilling the Pad's Washer).

Anti-Vibration Pads with Stems & Hardware removed

EASE OF USE REPLACING ALL SURFACE MOUNTED PROJECTORS

The same ability to change the Height and Angle of the Projector is retained. As this is a "Retro Fit" solution it does not require any Engineering Skill to replace the existing Projector feet with the new set taking seconds.

PART #	DESCRIPTION	LIST PRICE
NB-2Q-03	Set of (4) 2" Dia Adjustable Height Leveling Feet with 3" Long 8 mm dia. threaded Stem	\$189.95
NB-25Q-03	Set of (4) 2 1/2" Dia Adjustable Height Leveling Feet with 3" Long 8 mm dia. threaded Stem	\$199.95

THE ADJUSTABLE HEIGHT SECURITY FEET FOR ANY FLAT SURFACE OR STRUCTURE

When Security is an issue or the Projector is to be installed in a Mobile situation, we recommend using the Adjustable Height Security Feet with their 1" longer 8 mm dia Stems, the extra length allows the Projector to be bolted down to any Flat Surface.

Picture shows a locking Cabinet that protects the contents but not the Projector. In these cases the adjustable Height Security Feet would protect this Projector from being stolen

Security Feet available in either 2" or 2 1/2" Diameters with a Height Adjustment of 3"

THE SAME OPTION TO INCREASE THE PROJECTOR'S HEIGHT AND VIEWING ANGLE

The same option to change the Height and Angle of the Projector is retained
