

## PTZ TRIPOD CAMERA PLATFORM

Provides a More Stable Support for all PTZ Cameras

Expand the use of a Wall Mounted PTZ Camera into a Versatile Production Tool when fitted to a Tripod with all the added advantages a Tripod offers

Allows Users to use our uniquely designed Universal Quick Release Tripod Plate to attach to any PTZ Camera without modification to the Tripod

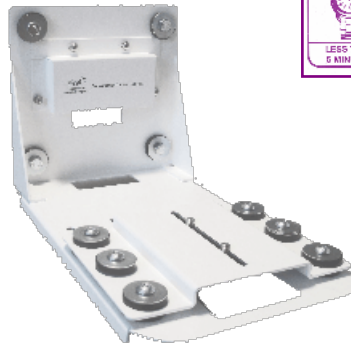

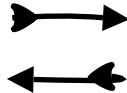

*NOW USERS CAN EXPAND THE USE OF THEIR PTZ CAMERA FROM PRESENTATION INTO A PRODUCTION TOOL*

WORKS WITH ALL PTZ CAMERAS  
INCLUDING THESE POPULAR MAKES

- Panasonic
- Sony
- Canon
- Vaddio
- Lumex

And many others

Take the PTZ Camera from the Wall Mount Bracket and attach it to the Tripod Platform and back again when you have finished

PTZ Camera Wall Mount Bracket

Platform Dimensions: 12" x 7.5"  
holds to PTZ Camera firmly in place

**NO MORE LOST TRIPOD SCREWS**

Each 1/4" Tripod Screw used for attaching the Camera to the Platform are "Factory installed and are held "Captive" in the Slot until they are required to be slid into the correct Camera's Tripod Mounting Position

The Platform has been removed (for photographic purposes) to show how our Universal Quick Release Plate slides on to the Tripod's Head and is then locked into place

**THIS "ALL IN ONE" TRIPOD PLATFORM IS A BREEZE TO ADAPT A WALL MOUNT PTZ CAMERA FOR TRIPOD USE**

Our "All in One" Tripod Platforms come **Completely Assembled** with (1) Quick Release PTZ Plate for mounting the Platform to the Tripod Head (2) 1/4" Camera Tripod Screws, (1) Camera Platform and for those PTZ Cameras that require a Power Supply such as some of the Panasonic Series, (1) Power Supply Bracket. For all other Camera Manufacturers or those that use a POE or an external Power Supply, the Clamp can be discarded. **For Single Tripod Screw Cameras, the unused 1/4" Tripod Screw is easily removed.**

**The same Platform works just as well with Video & Digital Cameras**

**Please see other side for more information and pricing**

**WHEN USING A PTZ CAMERA ON OUR PLATFORM ATTACHED TO A TRIPOD, STABILITY IS ASSURED**

For a PTZ Camera to be stable when Mounted on a Tripod, the Platform needs to be large enough to support the Size and Weight of the PTZ Camera. The size of our Platform at 12" x 7.5" makes it the perfect Solution.

**NIGEL B DESIGN'S QUICK UNIVERSAL RELEASE PTZ PLATE FITS MOST TRIPODS AND THE PTZ CAMERA USED**

The Quick Release PTZ Camera Plates supplied with each Platform are designed to take the PTZ Camera's 1¼.20 Tripod Mounting Screws that slide into the correct position of the PTZ Camera's mounting holes.

**Panasonic PTZ Camera shown attached to our combined Platform & Universal PTZ Quick Release Plate**

**USING A PTZ CAMERA ON A TRIPOD**

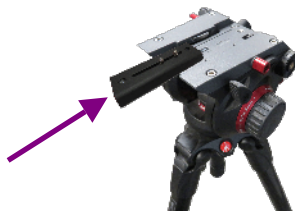

Because Tripod Plates use different hole patterns to a PTZ Camera (usually a 3/8" Tripod Screw ), it has been necessary to design our Quick Release Plates with ¼" Tripod Screws that you use to ensure compatibility between the two.

Nigel B Design Universal PTZ Quick Release Plates now fits any of the Tripods shown on the right without changing a thing

**OUR UNIVERSAL QUICK RELEASE PTZ PLATES FIT THE FOLLOWING TRIPODS**

- \* **Manfrotto**
- \* **Benro**
- \* **Libec**
- \* **Sachtler**
- \* **Cartoni**

The Platform has been removed (for photographic purposes) to show how our Universal Quick Release Plate and Platform Slides on to the Tripod's Head and is then locked into Place

Captive Tripod Screws slides along the Channel to mate up with the PTZ Camera's mounting positions

The Nigel B Design Universal Quick Release Plates are Tripod and PTZ compatible for a guaranteed match when mounted directly to the Tripod's Head with the Platform attached

PART #	PART #	PART #
